

MARGINAL COLUMN

By GEORGE LEONOS

INDONESIA has never known complete peace and stability. Ever since the impulsive declaration of independence at the end of World War II in 1945 and Dutch sovereignty continued for more than four years after that, the scattered archipelago has never been free of all manner of crises — political, economic and administrative. At various times one or another aspect of emergency forced ahead of the others, but they kept running in a fairly close pack all through the years, compounded by the Japanese during the war, the Indonesians have never had the benefit of a transitional period in which to weld together a people living on some 17,000 islands stretching across nearly 5,000 kilometers of the South Pacific. The nationalistic which inspired the 1945 declaration of independence did not yet make a nation in the modern concept, even though it may be said of the Indonesian Republic that its population is remarkably homogeneous.

It is doubtful whether the Indonesian central Government in Java has ever exercised full control over the larger neighboring island of Sumatra, whose population, about a quarter of Java's 50 million, provides a considerable part of the Republic's wealth in raw materials. If not the Sumatran population, then at least many of their leaders have always been conscious of the fact that, economically, the island can exist at least as well as a separate entity. Its geographic position, at the western extremity of the archipelago and almost touching Malaya, assures easy contact with the outside world, and, in fact, Sumatra has enjoyed a great degree of autonomy both politically and in foreign trade. These factors have made it a natural base for disaffected elements. The current rebellion against President Sukarno's Government is different only in degree. It is the first time that a group of political and military leaders have combined to challenge the authority of the central regime over the whole country.

BECAUSE of the continuous strife in the political and economic fields, it would be difficult to trace the current revolt to any single cause. The Sumatran regime's claim that there is a struggle to prevent Indonesia from coming under Communist influence is authentic, but it is not the sole factor. The Communist Party, claiming half a million members, polled more than 6 million votes in the 1955 elections to finish as the fourth largest party in the country, and has been gaining influence since then. Important Indonesian economic interests have been agitated by President Sukarno's willingness to make a joint partnership with the Communists in an "appointed" coalition cabinet which, under his concept of "guided democracy," would govern the country. Other economic interests, however, are just as opposed to the recent anti-Communist campaign which resulted in the seizure of Netherlands economic interests in the islands and aggravation of the nation's never stable economy. The Moslem parties — whose moderates and extremists together represent the most powerful political force in the country — want an Islamic republic, and while neither has joined the rebellion, they have not expressed any particular support for President Sukarno. In addition, there are disgruntled military elements whose dissatisfaction is not always identifiable with political causes.

THROUGH it now seems that the Government will eventually crush resistance in Sumatra, the revolt will have given President Sukarno and his supporters ample food for thought. As early as 1949 the President, disillusioned even then by constantly recurring crises, declared that he had lost faith in the democratic system of government. More recently he has said that it is entirely suited to Indonesian conditions. The truth of the matter is that democracy has never been given a chance in Indonesia.

WHEELER IN CAIRO
CAIRO, Tuesday (Reuters). — General Raymond Wheeler, who last year supervised U.N. clearance of the Suez Canal, is in Egypt conducting talks on the Canal's development. It was announced here today.

ZIONIST COUNCIL OPENS

Goldmann Urges Unity Of Israel and World Jewry

By MOSHE LEVIN, Jerusalem Post reporter
In a fire and brimstone speech at the opening of the Zionist General Council last night, Dr. Nahum Goldmann enjoined the State of Israel and the Jewish People to effect a reconciliation. The President of the World Zionist Organization warned that unless Jewish participation in the rebuilding of the State was increased to a substantial and radical way, "there is no chance whatsoever that we will be able to cope with the tasks in the second 10-year period." Without a united front, he said bluntly, the tasks of making Israel militarily secure, of developing the country, and of achieving large-scale immigration would fail.

"None of these problems will be solved even sketchily if Jewish support for Israel remains what it is today," he declared.
Dr. Goldmann turned his wrath on both the Diaspora and the State, and then in a different mood he pleaded with both to the separation of the two. He said that the first decade, and in harmony move on to new triumphs in the second decade. The Zionist Organization's leader offered no specific programme. He spoke of a "new relationship" and came closest to particulars when he said, "real partnership of the Jewish people with Israel will require their becoming familiar with the

BEN-ZVI: ZIONIST TASKS UNFINISHED

Jerusalem Post Reporter
President Izhak Ben-Zvi told the Zionist Movement last night that its tasks in rebuilding the State of Israel were far from completed. He spoke at the session of the Zionist General Council which was formally opened by the Council's Chairman, Mr. Yosef Sprinzak, in the Wise Auditorium on the Hebrew University campus in Jerusalem. The remaining of the 10-day meetings will be held at the Jewish Agency Executive building.

Mr. Ben-Zvi set the mood for the Council meetings by recalling the highlights of 60 years of Zionist activity. He noted that the Jewish people were now being celebrated — the 60th anniversary of the birth of the World Zionist Organization and the 10th anniversary of the establishment of the State.

Mr. Ben-Zvi spoke repeatedly of the Organization's responsibilities to the State. This was in vivid contrast to Dr. Goldmann's emphasis on a joint partnership and joint responsibilities. At one point, however, President Ben-Zvi referred to "close harmony with the State of Israel," but this appeared almost as an afterthought.

Tasks of Zionism
He set these tasks before the Zionist Organization: 1) to stimulate immigration "with every means at its disposal"; 2) fostering of cordial relations with the various nations; 3) cultural work; 4) settling the Jewish people in the country; 5) mobilizing among the Jews of the world political support for the State of Israel "against the boycott and the blockade which the Arabs have imposed on the country and against the hostile designs of the Arab states"; 6) "It must also lend every assistance in Israel's struggle to ensure the right of free immigration to this country."

President Ben-Zvi also called for a "more courageous approach in the investment of both private and public funds." Zionists must concentrate to a greater extent on the education of the younger generation, fostering Jewish schools, Hebrew language and culture and the study of the Bible in the original.

They must inculcate their children with a Jewish consciousness, for this can prove decisive in determining the fate of the coming Jewish generation in the Golan, in forging lasting ties between the Golan and the State of Israel," he stated.

The Zionist Organization's "responsibilities towards the people of Israel as a whole and towards the State of Israel," he said, "are growing," he emphasized. The President began by recalling Herzl's prophecy that the State would arise within 50 years. He went on to say

THE JERUSALEM POST

WEDNESDAY,
MARCH 18, 1958

Ike Opposes 'Panic' Plans To Meet Crisis

WASHINGTON, Tuesday (Reuters). — President Eisenhower said today he opposed "panic measures" which could turn a temporary recession in the U.S. into a long-term economic headache.

He said in a speech prepared for delivery to the Republican Party conference that his Administration had taken, and would continue to take, action to avert a recession, but that it was not going to be panicked by alarmists into activities that could actually make those hardships not temporary, but chronic.

Listing measures already taken, Mr. Eisenhower declared: "The Government has acted. I earnestly believe, in both a sound and timely fashion. The hard ships to individuals and their families of a temporary downturn in employment are not enough. But this Administration is not going to be panicked by alarmists into activities that could actually make those hardships not temporary, but chronic."

Reciprocal Trade
The President pleaded for support of his reciprocal trade program, pointing out that 4,500,000 Americans owed their jobs to the activity created by overseas trade. "If we are to sell to others, we must buy from others," he declared.

In New York, falls in share values of up to 25 were recorded on the stock market today in a continuation of the "down" which started yesterday. The selling affected most sections, with aircraft and steel and metals under major pressure.

The Wall Street Journal said today that forecasts are revising their forecasts and were now expecting a deepening of the current down-turn. The consensus is that the economy will be right for recovery about the fourth quarter of the year, "the paper added."

The U.S. Federal Reserve Board said today that it required reserves of its member banks today, thus releasing a potential \$1,000,000,000 of new funds for lending.

MAC Meeting Rules On Jordanian Complaint

A shell fired by Israel troops on March 9 and which landed in no-man's-land across the Demarcation Line in the Lebanon area was yesterday the subject of a meeting of the Mixed Armistice Commission.

The meeting, from which Israel was absent, decided that the firing was a breach of the Armistice Agreement. The Chairman of the meeting, noting that the third Jordanian complaint of this nature, and that another shell landed in Jordan territory in the same vicinity recently, said that the firing was "once more to the Israel authorities to take measures which will be effective immediately, and an end to incidents of this kind."

The Acting U.N. Chief of Staff, Colonel Errol Leary, added a note to the M.A.C. communiqué on the meeting, saying: "I fully endorse the statement made by the Chairman of the Mixed Armistice Commission concerning Israel's firing across the Armistice Demarcation Line. In addition to previous action by the Commission, I have already made representations to the Israel Government on this matter, expressing my grave concern about the recurrence of such incidents. I have received assurances that strict measures were being taken to avert such occurrences in the future."

"I regretfully note that these assurances have been of no avail, and I must reiterate the importance which I attach to the adoption by the Israel Government of strict measures of control over its troops training in areas close to the Armistice Demarcation Line."

U.S. Observer Raps Soviet Balloting

MOSCOW, Tuesday (Reuters). — Three U.S. observers who watched the Supreme Soviet elections were asked at a press conference attended by Soviet television, newspaper and newspaper reporters today: "Is the Soviet electoral system democratic enough to ensure free expression of the will of the people and do the results show that the Soviet people support the regime?"

One of them replied: "I would say certainly not in the Western democratic sense. The election was conducted as a demonstration of support for the regime."

Khrushchev: U.S. To Lag Behind

MOSCOW, Tuesday (Reuters). — Mr. Khrushchev said today that the U.S. was lagging behind the Soviet Union in the race to space today. "From this time on, the U.S. will always lag behind the Soviet Union in space because the Soviet Union has the greatest choice of capable people."

Mr. Khrushchev gave a 30-minute interview to the observers, who witnessed last Sunday's Supreme Soviet Elections. He told them the Soviet press would print a report by Mr. George Meany, the U.S. trade union leader, on unemployment and bad housing, "because we want our young people, who do not know what capitalism is, to learn about its drawbacks. Let them learn — not from Khrushchev, who is said to be a capitalist — but from Meany, who is not anti-capitalist."

Mr. Khrushchev also said: "Our industrial growth is three to four times greater than yours. The lines are bound to cross. This is not theory but fact."

The observers earlier told a Moscow press conference that they thought the Supreme Soviet elections were well organized, the Soviet News Agency, TASS, reported. One of them said it could be argued for months which system was better, but one thing was certain: the great source of strength of the Soviet Union was its strong, wise and steadfast people.

Egyptian Newspapers Banned in Lebanon

The Lebanon yesterday banned "Al-Ahram" and other Egyptian newspapers from entering the country following their publication of false reports about the Lebanese internal situation.

Saudi Arabia yesterday complained to the Lebanon about recent attacks on King Saud in the Lebanese opposition press, based on allegations that he plotted to keep Syria from uniting with Egypt.

The complaint was made through the Saudi Arabian Ambassador, Abdul Aziz Kubeishi, to the Lebanese Minister, Sami Solh. The latter afterwards told reporters that the attacks were not in the Lebanese interest.

In Cairo, "Al-Ahram" today claimed that Saudi Arabia, royal guards have "tampered" with evidence showing Saudi Arabia's implication in the alleged plot against Nasser and the United Arab Republic.

Syrians Fire On Field Workers
Syrian positions on Monday morning opened automatic fire on two agricultural workers employed in a field north of the Hala in Israeli territory. The Army spokesman announced last night. There were no casualties.

Dulles Rejects Space-for-Base Bid of Soviets

WASHINGTON, Tuesday. — Secretary of State Dulles today rejected Russia's attempt to link a ban on space weapons with the liquidation of U.S. overseas bases.

Mr. Dulles said the Soviet counter-proposal, broadcast Saturday and formally delivered to the U.S. yesterday, was "not in a very acceptable form and mixed up two issues that are quite unrelated."

He made his remarks at the airport here on his return from the South-East Asian Treaty Organization meeting in Manila.

The Russian proposal, he said, actively appears to contain nothing to be gained by the Soviet Union. The Soviet Union agreed to consider President Eisenhower's suggestion that a long-range missile be banned and that man's space efforts be devoted to peace under U.N. supervision, but it made the agreement conditional upon U.S. abandonment of its network of foreign military bases.

In Paris, signals from the new American satellite, known in France as "pamplemousse" (grapefruit), were picked up twice early today by the French Radio Corporation, their station at Limours near Paris.

Nasser May Attend African Talks in Ghana
ACCRA, Tuesday (Reuters). — Abdul Nasser, President of the United Arab Republic, may represent his country at a conference of independent African states due to open here on April 15, the African Ministry of External Affairs announced today.

Delegations from other countries attending — Ghana, Ethiopia, Libya, Morocco and the Sudan — will be headed by their Premiers, the statement added.

In Colombo, the Ceylonese Premier, Mr. Bandaranaike, today announced that his Government will shortly convene a conference of the "Bandung powers" or, alternatively, an Asian conference, to consider problems of inter-regional trade and operation in economic planning.

Food was one subject such conference could usefully discuss, he said. Twenty-nine nations attended the first Afro-Asian conference in Bandung, Indonesia, in 1955.

UAR Represented At Sea Law Parley

GENEVA, Tuesday (Reuters). — The 47-nation conference on the Law of the Sea today accepted the credentials of the delegation from the newly-established United Arab Republic.

A number of delegates, including those from the U.S., the Soviet Union, India and Pakistan welcomed the new delegation, whose leader is Omar Loutfi, permanent representative of the U.A.R. to the United Nations.

French Adopt Bill For Longer Life of Cabinets

Javits Warns On Bomb Outrages

WASHINGTON, Tuesday (INA). — Senator Jacob Javits (Rep., New York) today warned in remarks on the Senate floor that the recent bombing of Jewish institutions in the South represented a danger to other groups. He offered new legislation that would strengthen the Federal law protecting judges, like U.S. Judge William Miller, of Nashville, whose life was threatened simultaneously with the bombing of the local Jewish community center there.

A spokesman for the Department of Justice said the F.B.I. is continuing to observe the situation arising from the bombing of Jewish centers in the South and the threatening of Judge Miller.

U.S. attorneys in Miami and Washington are reporting to Washington on developments. The Anti-Defamation League of B'nai B'rith has evidence that segregation groups are planning a series of bombings similar to those launched last weekend. A.D.L. Director Nat. Perlmutter said in Miami yesterday.

"We are in possession of highly restricted evidence shared by the F.B.I. which is working on cases in other cities as well, he said. More than 300 posts and auxiliaries of Jewish war veterans were asked by their national leaders today to contribute to a reward for information leading to the arrest of the dynamiters."

300 Europeans To Evacuate Medan

Over 300 Europeans will be evacuated on Thursday from the north Sumatran capital of Medan, scene of new fighting between Indonesian Government troops and rebel forces. It was announced in Singapore yesterday.

The Singapore manager of the Netherlands Line said bookings for the Europeans were being made by the Company's Medan agent on the 30,180-ton liner Oranien.

Arrangements for the British Commissioner General's office said the evacuation was a voluntary affair.

The Government — commander at Medan — claimed to have been re-taken on Monday — said yesterday that rebel troops in north Sumatra had divided their forces and were fleeing in two directions, north and south.

P.I.A. News Agency reported from Jakarta that Government planes had destroyed a rebel convoy of trucks carrying flame throwers near the Central Sumatran oil centre of Pekanbaru. The rebel Government warned that it was about to launch a counter-attack in the Pekanbaru area.

The New China News Agency reported from Jakarta that 10 Russian ships had been sold to Indonesia and would be paid for from the recent Soviet loan.

Gaillard Wins Confidence Vote

PARIS, Tuesday (Reuters). — The Four-month-old Gaillard Government today won a vote of confidence from the Assembly by 252 votes to 198 on a bill to lengthen the life of French governments.

Tunisian Proposals Handed to Pineau

PARIS, Tuesday (Reuters). — British and U.S. representatives who arrived from Tunis last night with Tunisian proposals for solving the Franco-Tunisian crisis saw Foreign Minister Pineau today.

Messrs. Robert Murphy (U.S.) and Harold Barclay (Britain), expect to see Prime Minister Gaillard later. They are trying to arrange a resumption of French-Tunisian negotiations on disputes between the two countries.

The Tunisian proposals were understood to be passed for the time being the French problem of Algeria. However, usually well-informed sources said the entire Tunisian plan hinges on France declaring her willingness in principle eventually to evacuate her naval base at Bizerta.

Can 'Resolve Assembly'
Under the bill the Government has power to dissolve the Assembly in certain circumstances, but the President of the Republic can override the decision if he considers circumstances are not so serious as to warrant dissolution.

Only part of the bill was finally approved today. The clause on confidence motions will be considered later this week.

Thousands of police had been drafted into Paris and 300 steel-helmeted guards were today posted outside the Assembly.

M. Gaillard, addressing the Assembly, described last Thursday's police demonstration as "inexcusable" and said an inquiry was progressing. He added that, while the Government does not wish to minimize the seriousness of this incident, it does want to avoid any confusion being created between a minority of dubious elements and the majority of the Paris force which disapproved Thursday's incidents.

The Premier said there was a danger of a revival of the extreme right union which, under cover of patriotic slogans, wanted to provoke disorder in Paris, a state of affairs that could only weaken France in facing her difficulties in north Africa.

Our sincere condolences on the death of
Dr. Gershon Meron

New UNTSO Chief Due Tomorrow

The new Chief of Staff of the U.N. Truce Supervision Organization, Major General Carl Gustaf von Horn of Sweden, is expected to arrive by air today in Beirut and to fly on to Kalendia airport in the Old City, tomorrow. It was learned in Jerusalem last night.

It was reported from U.N. Headquarters in New York last night that Sweden will increase the strength of its battalion serving with U.N.E.F. from 300 to 510 men during the next six weeks.

With deep sorrow we announce the sudden death of our general manager
DR. GERSHON MERON
and join the bereaved family in their deep sorrow.

Social & Personal

The Minister of Posts, Dr. Yosef Burg yesterday received Mr. Ezer Weizman, Agnelli, editor of "El Post," of Florence.

The Minister of Health, Mr. Y. Baratz, yesterday received Mr. Ezer Weizman, Agnelli, editor of "El Post," of Florence. Dr. Baratz, the Israeli director of Hadassah, Dr. Y. Mann, and the Director-General of the Ministry of Health, Dr. A. Ben-Zvi, were present at the meeting at which Hadassah health activities in the country were discussed.

Mrs. Rachel Ben-Zvi yesterday received leading members of the Israeli Rheumatism Professor Association.

Professor Herman F. Mark, Director of the Polymer Research Institute at the Polytechnic Institute of Brooklyn, U.S.A., and world-renowned authority on polymers and plastics, will lecture (in English) on "Recent Advances in Plastics and Fibers" at 4 o'clock this afternoon in the Wm. Auditorium at the Weizmann Institute of Science in Rehovot. All interested are cordially invited to attend.

An informal discussion on "Science and Modern Life" is to be held at the Weizmann Council, 13 Idelson Street, Tel Aviv, at 8.30 p.m. today. The discussion will be led by Sir Ben Lockspeiser.

Dr. Ralph F. Dorfman, Director of Laboratories, Worcester Foundation (U.S.A.), will lecture on "Synthesis of Steroid Hormones" under the joint auspices of the Hebrew University-Hadassah Medical School, the Hadassah Medical Organization and the Israel Medical Association tonight, at 7.45, in Lecture Hall "A," the Medical School.

Mr. A. Akavia will speak on "The Business Budget as an Administrative Tool" at the Haifa Rotary Club, Appinger Hotel, at 1.15 p.m. today (Wednesday).

The second Judah L. Magnes Memorial Lecture, which was to have been delivered at the Hebrew University tonight by Prof. Carl Frankenstein, has been postponed owing to the indisposition of the lecturer.

BIRTH
CLYMAN — To Miriam (née Brunn), a son — brother to Michael and Tovi.

MEMORIAL MEETING
A tombstone unveiling ceremony took place last Sunday at the graveside of the late Mordecai Narkis, Curator of the Bezalel Museum, on the first anniversary of his death. A memorial gathering was held later in the evening at the Bezalel National Museum followed by the opening of a memorial exhibition of selected exhibits presented by the deceased over a period of 14 years.

Grandson of 'The Baron' With European Mission

LYDIA AIRPORT, Tuesday. The grandson of 'The Baron' of Hirschfeld, one of the distinguished members of the European Economic Conference, arrived here late tonight by El Al.

This is Baron Hirschfeld's first visit to Israel. The 41 members of the group are led by the French Jewish community (Consistoire Central de France). The group is headed by the French Jewish community (Consistoire Central de France). The group is headed by the French Jewish community (Consistoire Central de France).

The guests were met at the airport by the Director of the Ministry of Finance, Dr. Y. Arnon, and the Director of the Bond Office in Israel, Mr. L. Kohn. The mission is putting up at the Sharon Hotel, Herzliya during their visit, which is under the auspices of the Bond Office.

Shell Co. Employees To Stage Protest

HAIFA, Tuesday. Employees of the Shell Company here will stage a protest tomorrow to back their demand for the establishment of a pension fund for the company.

The decision was taken tonight at a general meeting of the employees. The workers' committee were instructed by the meeting to step up their struggle for the pension fund and to call a general strike, if necessary.

The Shell management agreed to establish the fund four years after following a strike.

Rockefeller Grants To Hebrew U. Profs.

Dr. David Ayalon and Dr. Uriel Heyd, both Associate Professors of the Modern History Department, Hebrew University, have received a grant from the Rockefeller Foundation in New York to a total value of \$5,000 to enable them to continue their researches abroad during 1958-59.

Prof. Ayalon is studying the transformation of Egypt from 1700 to 1850, and Prof. Heyd is studying the transformation of the Ottoman Government and ruling classes in the 19th century, for which he received a grant from the Hebrew University Foundation in 1955. The researches will be carried out in Western Europe and Turkey.

Life-Size Photo Of Walling Well

Jerusalem Post Reporter. A Natural-size photograph of part of the Walling Well in the Old City of Jerusalem will be on view at the Tenth Anniversary Exhibition opening in the capital on June 1. It was announced yesterday.

The photograph will measure 12 metres in width and three metres in height, and will show the summit of the wall in their natural state. It is being executed by Alfred Bernheim, Jerusalem, who took the original photo in 1946.

Memorial Meetings Held For Macedonian Jewry

Two memorial meetings for the 7,000 Macedonian Jews, handed over to the Nazis by Bulgarians who occupied the part of Yugoslavia at the time, were held last week.

One was conducted at Shapir, and was organized by the Jewish community and the Freedom Fighters organization. Wreaths were laid on the Jewish memorial, and Government officials took part in the ceremony.

The second meeting was held at Bnei Brak, and was organized by the Freedom Fighters alone, since there are no Jews in the area any longer. The Freedom Fighters have issued a pamphlet on the history of Macedonian Jewry.

The second meeting was held at Bnei Brak, and was organized by the Freedom Fighters alone, since there are no Jews in the area any longer. The Freedom Fighters have issued a pamphlet on the history of Macedonian Jewry.

GOLDMANN PLEA FOR PARTNERSHIP

(Continued from Page One)

real partner rather than a helper in the State's upbuilding. Dr. Goldmann then went on to emphasize the Jewish community's non-sensational feeling of sovereignty with the result that it had not and was not to go on its knees to the Jews of the world begging for help, instead of approaching Jewish communities as partners in one piece of work.

Joint partnership, continued Dr. Goldmann, would not only provide the financial means from abroad but "even more important... would provide Israel in the coming decade with manpower from the Jewish communities of the West."

The first great mistake in the State-Diaspora relationship was made after the creation of the State, when at the first Zionist General Council "we decided on a separation of functions, tasks and duties between the State and the Movement... Instead of separation we should have proclaimed joint partnership. The result of this approach was disastrous both with regard to the Diaspora and with regard to Israel."

The result was that Israel became a philanthropic cause for the Diaspora. Dr. Goldmann then launched an acid attack on what he said were untruthful financial appeals. "We had to stimulate, year in and year out, by means of new slogans the Jewish community to help. We had to come to such depth of propaganda as the appeal to save a Jewish immigrant for a thousand dollars. These slogans were never even correct or truthful. We sold Israel and the task of saving the hundreds of thousands of Jews very cheaply. We know that it cost \$15,000 to settle a family, and we sold this for \$1,000 or \$2,000."

The result was, he continued, that every Jew and community felt proud of what they did, but in fact refused to take responsibility for the real problem and difficulties of the State.

Turning to Israel, he said that the separation made Israel feel it could do it all by itself; made Israel, particularly the youth, contemptuous of Zionism.

He singled out the Zionist organizations in the U.S. for failing to implement the decisions of the Congress, among them the plan for territorial settlements, and unbridled political parties for fighting over phantom issues and maintaining "meaningless positions."

Then he warned the Organization that if it was not able to rejuvenate itself, the State would have to create other institutions.

He said that too much effort and money were still concentrated "on the old-fashioned methods of fighting anti-Semitism and relief." The efforts must be in the direction of youth work and education of culture and education.

This morning, the Council will begin a general debate on Dr. Goldmann's address.

DR. SANDEL BEER formerly of Vienna, now of Miami, Florida, is visiting Israel and wishes friends and relatives here to contact him at: Kibbutz Ginosar, Post Tiberias.

Today's Postbag

The Weather

Forecast: Generally fair but with a few showers. High pressure over the Mediterranean. A low moving out of the Atlantic. A low moving out of the Atlantic. A low moving out of the Atlantic.

ARRIVALS

Dr. Samuel Beer, noted social philosopher, arrived in Jerusalem today for a two-month stay. He will be working on a book on the history of the Jewish people.

THE HAIFA EXECUTION OFFICE

will be closed to the public on March 19, 20 and 21, as it is being transferred to the Government House building.

A CIVIL DEFENSE EXERCISE

will be held in the Tel Aviv district on Thursday. The exercise will be a simulation of a nuclear attack.

17,500 Teachers

Vote Today

Over 17,500 teachers will vote tomorrow on a proposal to form a teachers' union.

Doctors' Wage Claims

Committee To Meet

The committee appointed by the Ministry of Health to study doctors' wage claims will meet tomorrow.

Funeral of Dr. Gershon Meron

The funeral of Dr. Gershon Meron, General Manager of the Tel Aviv Post, will be held tomorrow.

ILAO, 2000 won yesterday

by No. 99204 of the second supplementary series in the Tel Aviv, No. 99204 of the first supplementary series won IL20,000 and No. 40954 of both supplementary series won IL10,000 each.

ILAO, 2000 won yesterday

by No. 99204 of the second supplementary series in the Tel Aviv, No. 99204 of the first supplementary series won IL20,000 and No. 40954 of both supplementary series won IL10,000 each.

Gov't Pressure On El Al Partners

The Government is putting pressure on its partners in El Al to increase their financial participation.

All-Weather Bridge to Ashdod To Be Ready Next Month

By H. D. GROSS, Jerusalem Post Reporter

ASHDOD, Tuesday. — The lifeline to this embryo city will be ensured against all floods and gales from next month when the Ashdod bridge is completed.

Today's news was that the bridge over the Jordan is the only other bridge in the country built by this method.

A valid test of its solidity is the fact that the massive concrete bridge, which has a boom of 24 metres, spans the first span and is at present awaiting its final coat of paint.

Workmen all Israel, the methods are French, the designers, engineers and workmen are all Israeli.

The construction crew are comprised mostly of immigrants from Morocco and Turkey without previous experience.

Ramat, of Tel Aviv, was founded in 1941 and put up many installations for the British army. It is now engaged mainly in building houses and estates but was also responsible for the Ashdod road railway terminal in Tel Aviv.

Having brought journalists to the site, the Ministry of Labour was not content to show us just a bridge, however impressive. We were shown, from a distance, the power station, the outlet of the Eilat oil pipeline and the site of the future deep-water harbour.

Beyond the vast barren area on which we are assured, the industrial area will arise in due course, lies the first of the housing estates, uncannily like the new Karmel suburb of Jerusalem. There they sit, on the sand dunes, the first 4,000, complete with cooperative stores, clinic and two cultural centres, side-by-side. The inhabitants work in the power station or on building, making their own city as did the founders of the metropolis further north along the coast 50 years ago.

The Lahavot Hahashan

French Invention

The pre-stressed concrete system was invented by a French engineer in 1928, and the method used by the present builders, Ramat, Ltd., contractors for the Public Works Department, is based on the Freyssinet Company's method.

The strain is borne in the main by steel cables (of the same material as is used in plane strings) inserted through pipes embedded in the concrete. The whole is subjected to stress and strain or tension and compression force, resulting in the ability to withstand pressure up to 500 kg. per sq. cm. This is three times the usual strength needed in such structures and one-and-a-half times what was judged necessary for this particular bridge.

The whole is subjected to stress and strain or tension and compression force, resulting in the ability to withstand pressure up to 500 kg. per sq. cm. This is three times the usual strength needed in such structures and one-and-a-half times what was judged necessary for this particular bridge.

The Lahavot Hahashan

French Invention

The pre-stressed concrete system was invented by a French engineer in 1928, and the method used by the present builders, Ramat, Ltd., contractors for the Public Works Department, is based on the Freyssinet Company's method.

The strain is borne in the main by steel cables (of the same material as is used in plane strings) inserted through pipes embedded in the concrete. The whole is subjected to stress and strain or tension and compression force, resulting in the ability to withstand pressure up to 500 kg. per sq. cm. This is three times the usual strength needed in such structures and one-and-a-half times what was judged necessary for this particular bridge.

Gateway to Capital Is Now Open

The winding road into Jerusalem, called Jaffa Road, this week presents a startling appearance.

Many of the old stone houses and workshops have been painted, partly in bright, light tones and partly in dark.

The Municipality made the materials available at a low cost in order to brighten the city in honour of the Tenth Anniversary.

Considerable efforts went into the painting of the road. The city is now a sight to behold.

Despite the fact that they attempt to withhold recognition from the Israeli authorities, they responded and painted their houses brown.

But the fresh paint was immediately covered by posters proclaiming "Down with the Zionist Municipality."

NEW SWISS ENVOY ACCREDITED

The new Swiss Ambassador to Israel, Mr. Emil Blang, yesterday presented his credentials to the President at Beit Hamas, Jerusalem.

In his address, Mr. Blang declared that he regarded the decision of "the two governments to raise our diplomatic relations to the level of an ambassadorial level an expression of a wish to cement still further the cordial ties which fortunately exist between them."

The President in his reply, noted that Switzerland had served as "the cradle of the vision of Israel independence some sixty years ago" and that it was fitting that "this tradition should constitute a firm foundation for the cordial relations between our two countries."

The Army band played the national anthems of the two countries on the Ambassador's arrival.
